- External Dimensions:
W409xD520xH569mm
- Capacity Instant Canisters:
4x1.2L
- Noise Emission: <70dB
- Weight: 23kg

INSTALL WASTE TO BASE DRAIN

There is the option to have plumbed drainage from the drip tray to waste water drain:

Required Items:

- The Primo Drain Hose WVS
PN: 1057278 (Midi) (if needed)
- A screw driver
- Combination Pliers

NB: The machine must be situation within close proximity of a waste water drain - and there needs to be height differential to ensure the water flows freely into the drain.

1

Remove the drip tray from the machine

2

Drill a 6mm hole in drip tray connector.

3

Connect the drain hose to the drip tray connector.

4

Route the hose to the rear under the machine.

5

Place and fix the drain hose in the waste water drain.

6

Replace drip tray at the front of the machine.
