**westomatic**  
*make it happen*

## TROUBLESHOOTING GUIDE

### MACHINE ISN'T DETECTING BOTTLE

- Clean the sensor in dispense area.
- If the issue persists, sensor may need adjusting by engineer.

### WASTE BUCKET FULL

- Remove waste bucket and empty.
- Ensure weighted pipe is placed back in the bucket.
- Turn machine off and back on again to reset the error message.

### ERROR CODE 14

- A sub-number will also be displayed (i.e. 14-02) indicating what component/circuit is at fault.
- Call-out required by engineer.

### POWDER NOT DISPENSING

- Check there is still powder in canisters (agitate to free powder) .
- Clean dispense nozzle/whipper/pipe to ensure there is no blockage.
- Press flush buttons to flush pipes.

### CHILLER NOT DISPENSING COLD WATER

- Check Fuses
- If issue persists contact engineer

### SOUND AND VIDEO ADJUSTMENTS

- Scan QR for instructions on using the screen
