TROUBLESHOOTING NETWORK CONNECTION

A lot of Guest WiFi's have rigorous Firewalls and although it may say connected, you may be struggling with connection. We can perform a test to check that it is successfully connected.

1 CONTROL PANEL

From service menu enter Control Panel.

2 TELEMETRY TEST

Enter Telemetry Test to perform a connection check.

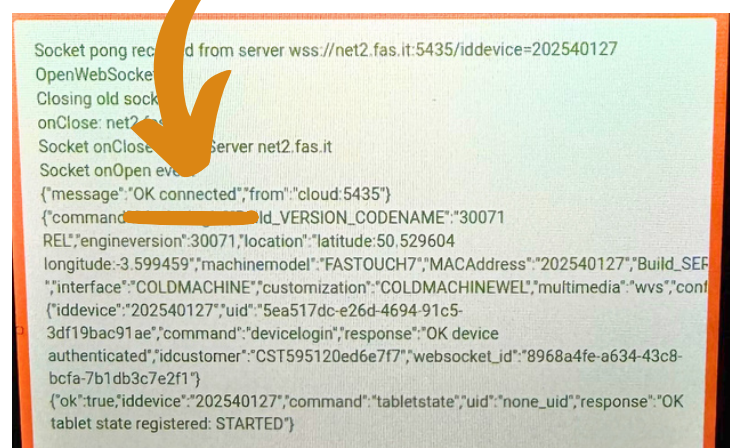

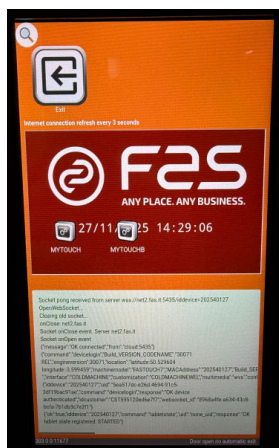

3 TELEMETRY TEST

An automatic test will run to check network connectivity.

LOOKING FOR:

CONNECTED

If no connection - you need to find a different server to connect to.
